

# ENVIRONMENTAL POLICY

**Sport Wales recognises the impact it has on the environment and is committed to monitoring and effective management to reduce this impact.**

The Sport Wales National Centre is located in Cardiff and is owned by the Sport Wales.

The centre's primary role is to provide training and competition facilities for National governing bodies of sport. It also provides recreational facilities for the local community.

The centre recognises the impact that its operations have upon the local environment. These impacts occur through the generation of waste, use of energy, and the procurement of products and services.

---

## WE WILL

- Commit to prevent pollution.
- Communicate this environmental policy to all staff and centre users and ensure that the policy is implemented at all levels.
- Continuously improve our environmental performance by setting objectives and targets, against which our environmental performance can be measured.
- Comply with relevant regulatory and legal environmental requirements, and use cost effective techniques to ensure that the environmental impacts of our activities are minimised.
- Deliver an energy policy that is committed to monitor and reduce electrical, gas and water consumption.
- Manage waste effectively to increase recycling rates and reduce waste to land fill sites.
